FAST Effective Relief from Toothache

Dentogen Clove Oil gel provides soothing and fast relief from toothache caused by dental cavities.

Clove Oil is a natural local anaesthetic and is also antibacterial. Dentogen has harnessed these properties in a convenient sugar free gel formula for ease of application to provide soothing relief at the source of discomfort.

Active ingredient:
Clove Oil 20.0% w/w.

Indications:
For the temporary relief of toothache due to dental cavity.

Usage and Administration:
Adults, Children and the Elderly:
Apply a little gel (approximately the size of a pea) to the affected part of the tooth using either a clean finger tip or cotton bud. Re-apply after 20 minutes and after every 2 hours if required. Repeat for maximum relief.

Precautions and Warnings:
Not to be used if allergic to any component.
Prolonged use should be avoided.
Dental attention should be sought as soon as possible.
Dentogen gel contains glycyrrhine glycol, which may cause pseudo-allergic reactions.

FIRST IN PROFESSIONAL AND BUSINESS DEVELOPMENT

brier

oral health

Dentogen clove oil gel provides fast and soothing relief from toothache caused by dental cavities, says Crescent Pharma. The sugar-free gel harnesses the natural local anaesthetic of clove oil, which is also antibacterial, and is suitable for those requiring temporary pain relief until professional help can be sought. (Tel: 01256 77242)

At this time of year, it's time to be protected from increasing UV radiation and UVA. UVA protection goes maximum five-star UVA protection. Other benefits include tea tree oil and moisturising protection against dry chapped lips. (Tel: 01582 568333)

CLOVE OIL GEL

Fast Relief From Toothache

Dentogen Clove Oil gel provides soothing and fast relief from toothache caused by dental cavities. Clove Oil is a natural local anaesthetic and is also antibacterial. Dentogen has harnessed these properties in a convenient gel formula for ease of application to provide soothing relief at the source of discomfort. Active ingredient: Clove Oil 20.0% w/w.

Indications: For the temporary relief of toothache due to dental cavity. **Dosage and Administration:** Adults, Children and the Elderly: Apply a little gel accurately to the affected part of the tooth using either a clean finger tip or cotton bud. To be repeated after 20 minutes and then every 2 hours if required. In infants, that occur normally. **Precautions and Warnings:** Not to be used if allergic to any component. Prolonged use should be avoided. Dental attention should be sought as soon as possible. Dentogen gel contains glycyrrhine glycol, which may cause gum or skin irritation. PL: 23444002 Legal Category: OTC. For further information please consult the summary of product characteristics available from Crescent Pharmaceuticals Ltd.
